Technical Skills

- HTML
- CSS
- Figma
- Microsoft Office
- Web and Mobile Design
- Google Analytics
- Canva

User Experience Design:

- Conducted user research, usability testing, and user journey mapping to gather insights and inform design decisions for a redesign of Performance Now Theater Company's ticketing and donations user flow.
- Skilled in creating wireframes, interactive prototypes, and user flows using tools such as Figma.
- Knowledgeable in information architecture and creating intuitive and user-friendly navigation systems.

User Interface Design:

- Strong understanding of visual design principles, color theory, typography, and layout; applied strongly in expressing the brand guidelines for Mile High Pie Company's website.
- Experience in creating responsive designs that adapt to different screen sizes and devices for example, my redesign of the FCC website.

Collaboration and Communication:

- Excellent interpersonal skills, collaborative with cross-functional teams, including developers, product managers, and stakeholders.
- Strong verbal and written communication skills in articulating design concepts, ideas, and recommendations.
- Proven ability to incorporate feedback and iterate on designs based on stakeholder and user input.
- -Ability to anticipate needs developed in the hospitality industry.
- -Known for empathy and adaptability as a recreational therapist.
- -Creative background as an opera singer, actor, and stand-up comic promises innovative approaches to writing, presenting, and storytelling.

User Research

- -Conducted one on one user research to test website usability for the FCC website redesign.
- -Utilized Google Analytics to optimize web page experience.
